WOODSBORO LAND IS A FULLY IMMERSIVE HORROR ENTERTAINMENT EXPERIENCE THAT CAPTURES THE VISUAL IDENTITY OF THE ORIGINAL SCREAM FILMS THROUGH CINEMATIC DESIGN, LIVE ENTERTAINMENT AND ENVIRONMENTAL STAGING. THIS PROJECT SHOWS HOW CINEMATIC DESIGN CAN TRANSFORM A CULT HORROR UNIVERSE INTO A FULLY IMMERSIVE ENTERTAINMENT EXPERIENCE.

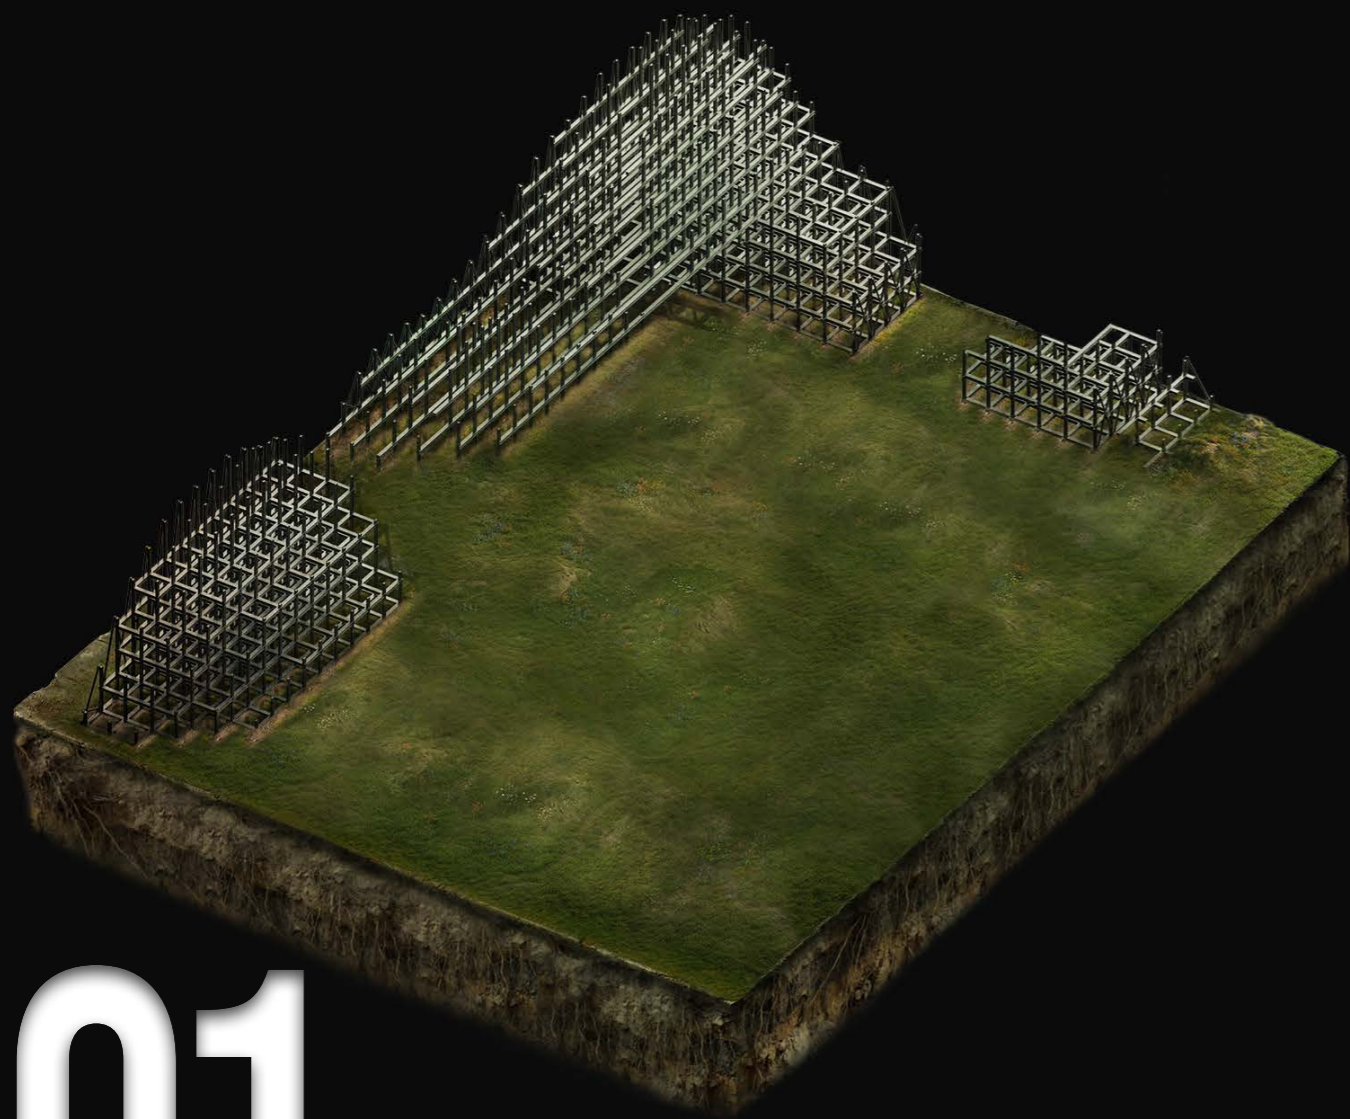

ENTERTAINMENT CONCEPT INSPIRED BY THE ATMOSPHERE S. THROUGH THEMED ARCHITECTURE, DARK RIDE EXPER- STORYTELLING, THE PROJECT EXPLORES HOW FEAR AND DIVERSE INTO A LARGE SCALE DESTINATION EXPERIENCE.

CONSTRUCTION PRINCIPLE

Scenic Mountain, Show Building and Macher House Facade Integration

01

Primary terrain established with steel framework designed to support elevated scenic structures, similar to large scale themed mountain construction, structural base preparation.

02

Scenic mountain integrated onto steel framework, along with the Macher House facade from Scream, serving as the entrance to The Final Cut attraction and its queue line.

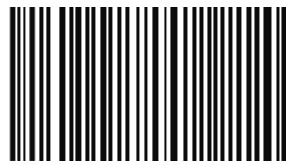

03

Show building added to house The Final Cut dark ride, providing the technical volume required for ride systems and operational areas, including maintenance and service circulation.

04

Final mountain structure completed over the show building, concealing technical volumes and directing guests through the Woodsboro Police Station before returning to the land.

Quite simply an **absolutely magical place** to stay in with our young family for our trip to Disneyland!
It is obvious that the owner has spent a substantial amount of time, effort and money to turn the flat into a high class, Disney-themed adventure, with **the attention to detail evident** at every corner. The photos on the listing are a true reflection of the magic that awaits once you are inside.

It's a **spectacular apartment**, a Disney 10 decoration !!!
You have to see... much better than the hotels in Disneyland !
Everything was great !!
Thank you Guillaume

Better than any Disney hotel, you will find it. This is **the most incredible place** you could think of staying, **every square centimeter** has been taken care of to maximize your stay by feeling the magic of Disney in every room, and wherever you look. This host was the most friendly, welcoming, helpful, kind and generous we have ever known. The arrival was very easy because of all the photos to describe where to go and how to get there. This made our vacation perfect and we would like to be able to stay longer than we were very sad to leave, but very happy that we were able to discover **the magic of Disney's apartment**.
Thank you for making our vacation the most magical experience we have ever had.

I had the opportunity to spend a short stay in this accommodation. The apartment itself is beautiful, a lot of detail and really exotic. A real plus so that **Disney's magic continues even once out of the park**.
Close my eyes I would recommend this accommodation.

Just «**wow**» !
Thank you Guillaume for this experience.
It's not just a housing but almost an «attraction».
In addition to that, it's super clean.
Everything in the details.
Next to everything.
I really recommend.
Thank you.

BUZZ LIGHTYEAR BEDROOM

INTERACTIVE CHILDREN'S SPACE

The children's bedroom was developed as an interactive and playful environment inspired by futuristic space exploration themes. Oversized elements, sculpted storage volumes, and a themed console connected to the room's multimedia system create a dynamic and immersive setting reinforced by a ceiling treatment inspired by attraction-style technical environments.

BEAST'S CASTLE BEDROOM

SIGNATURE MASTER SUITE

The master bedroom represented a major architectural challenge recreating the interior interpretation of a theatrical castle. Sculpted elements, theatrical lighting, and blacklight painting techniques were used to simulate architectural details.

theatrical balcony inspired by enchanted castle environments within a constrained residential space. Custom depth and recreate the atmosphere of a magical interior.

ARIEL UNDERWATER BATHROOM
IMMERSIVE THEMED ENVIRONMENT

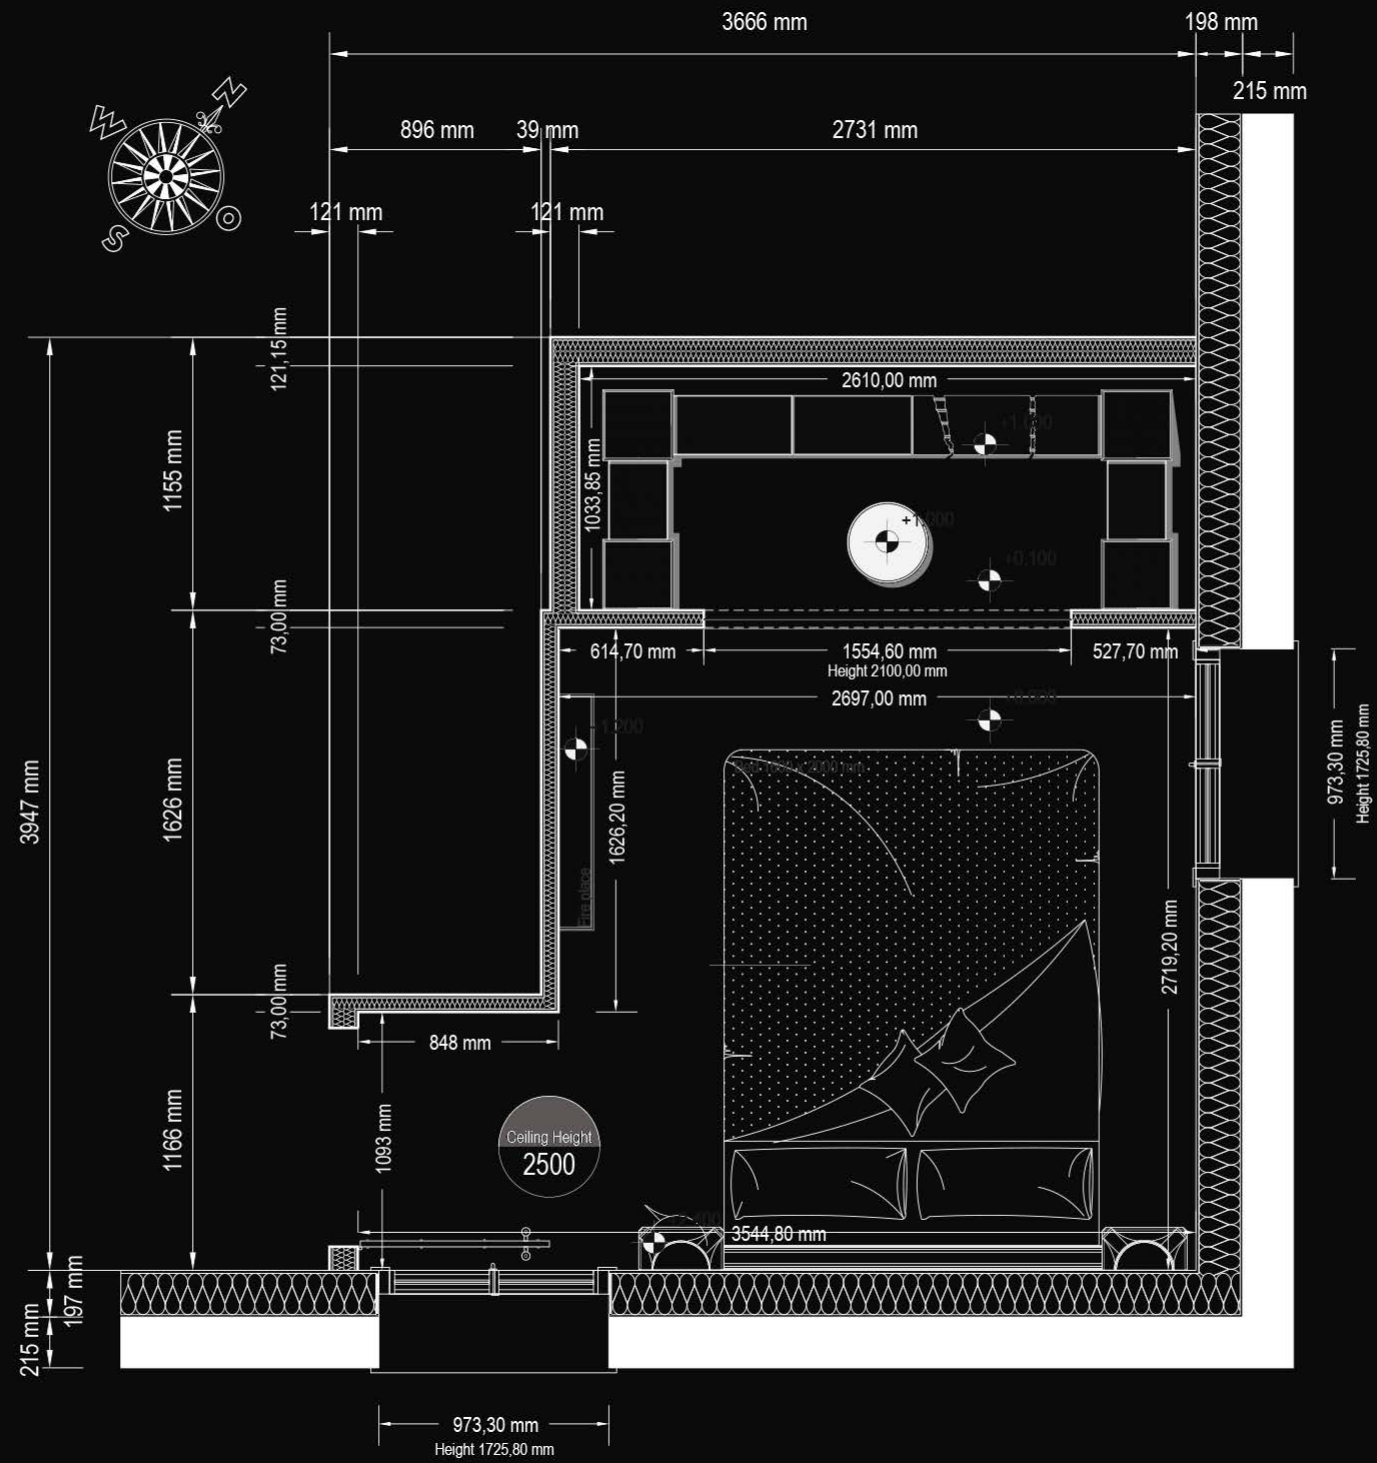

The bathroom was designed to recreate the illusion of an underwater world inspired by oceanic environments and mythical aquatic settings. Sculpted rock textures, integrated lighting, and reflective surfaces were used to simulate depth and movement, creating the sensation of entering a fully immersive aquatic environment once the door is closed.
